## EDUCATION

### New York University Abu Dhabi

Aug 2016 - May 2020

B.S. Mathematics, B.S. Computer Science - GPA: 3.89/4.00 (Cum Laude)

Abu Dhabi, UAE

**Relevant Coursework:** Machine Learning, Algorithmic Foundations of Data Science, Artificial Intelligence, Database Systems, Visual Analytics, Advanced Probability, Mathematical Statistics, Privacy and Fairness in Data Science

## SKILLS

**Python** (Pandas, Scikit-learn, Pytorch, Keras, Tensorflow, Scipy, Numpy, Matplotlib, Seaborn, Plotly, Bokeh, Flask), **JavaScript, SQL, R** (Shiny), C, C++, Java, Mathematica, Spark, Git, Bash, Linux, L<sup>A</sup>T<sub>E</sub>X. **English (Bilingual), Spanish.**

## WORK EXPERIENCE

### Research Assistant

Aug 2021 - Present

Databases Group at Duke University Department of Computer Science

Durham, NC, USA

- Researching explanation methods for data-driven systems using causal inference. Developed an interactive webapp for data analysts to perform hypothetical What-If and How-To analysis in relational data with an extension of SQL.
- Teaching Assistant for the course *Mathematical Foundations of Computer Science*. Completed graduate coursework in Artificial Intelligence, Database Systems, and Privacy and Fairness in Data Science, regularly presenting research papers.

### Data Scientist

Aug 2020 - June 2021

Quantil S.A.S.

Bogota, Colombia

- Developed an end-to-end machine learning solution to predict credit risk for a company focused on the distribution of cycling products, successfully detecting more than 90% of the largest delayed payments and overall ROC-AUC of .79.
- Analyzed the dynamic spatio-temporal behavior of homicide data in Bogota using Zero-Inflated Embedding models [3].
- Studied the effect of compliance with quarantines and lockdowns on domestic violence during the Covid-19 pandemic in Bogota using mobility data and Generalized Additive Models (GAMs).
- Developed interpretation methods for Conditional Generative Adversarial Networks (cGAN) to predict robberies using SHAP values. Implemented the calibration of the network for fairness using kernel mean embeddings [2].
- Collaborated within diverse teams of mathematicians, economists, engineers, and scientists. Regularly gathered and presented results through client meetings, progress reports, and 3 academic research publications.

### Data Science Intern

June 2019 - Aug 2019

Nexquare

Dubai, UAE

- Enhanced machine learning models predicting student performance and employability, by developing and incorporating an interpretability and visualization module within the analytics platform, collaborating with teams across Dubai and India.
- Integrated the Python and R back-end for the platform, allowing seamless use of models developed in both languages.

### Machine Learning Intern

June 2018 - Aug 2018

Visualization and Data Analytics Lab at NYU Tandon School of Engineering

New York City, NY, USA

- Trained SVMs, Random Forests, and Neural Networks to predict customer credit risk from a FICO home credit dataset.
- Developed visual and interactive explanations for the models based on feature importance and counterfactuals. Our solution [5] earned 2nd place in the **FICO Explainable ML Challenge**. We generalized it for tabular data in the papers [1] and [4].

### Machine Learning Research Assistant

Feb 2017 - May 2018

Music and Sound Cultures Group at NYU Abu Dhabi

Abu Dhabi, UAE

- Led the analysis for the NYUAD library collection of more than 10,000 Arab and African records, using computational audio analysis, machine learning, and visualization techniques.
- Developed an interactive webapp to explore musical similarity using k-means clustering, deep autoencoders, and t-SNE [6].

## PROJECTS AND PUBLICATIONS

1. **AdViCE: Aggregated Visual Counterfactual Explanations for Machine Learning Model Validation.** IEEE Visualization Conference (VIS 2021).
2. **Interpreting a Conditional Generative Adversarial Network Model for Crime Prediction.** Iberoamerican Congress on Pattern Recognition (CIARP 2021).
3. **Zero-Inflated Embeddings to Analyze Homicide Occurrence Patterns.** International Conference on Computing and Data Science (CDS 2021).
4. **ViCE: Visual Counterfactual Explanations for Machine Learning Models.** ACM Conference on Intelligent User Interfaces (IUI 2020).
5. **FICO Explainable Machine Learning Challenge:** Webapp with global and local explanations for machine learning models predicting customer credit risk. Tech: Python, JavaScript, D3.js, Flask, scikit-learn.

## HONORS AND AWARDS

**Full Scholarship:** New York University Abu Dhabi

2016 - 2020

**2nd Place Winner:** NYUAD International Hackathon

Apr 2020

**2nd Place Winner:** FICO Explainable Machine Learning Challenge

Jan 2019

**Best Admission Score (Nationally):** Universidad Nacional de Colombia

Apr 2016

**Honorable Mention/Bronze/Silver:** International/Iberoamerican/Centroamerican Math Olympiads

2014 - 2016

**Leadership / hobbies:** NYUAD Mathematics Club President, Tennis, Basketball, Biking, Guitar, Bass, Drums.
